DETAILED ACTION

Response to Amendment

This Office Action is in response to applicants' Request for Reconsideration filed on December 5, 2005. The rejections of this application have been withdrawn due to a restriction requirement (the examiner should have raised the issue of restriction and the examiner takes this opportunity to correct her position by raising the issue of restriction). Claims 1-69 are presented for examination.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
 - I. Claims 1-10, drawn to a method for maintaining in a network node a data structure that includes a set of domain names and at least one alternative domain name corresponding to each domain from the set of domain names, the network node coupled to a wireless network and a wired network and using the data structure to validate a domain name associated with an attempt to access a network site on the wired network by a mobile device on the wireless network, classified in class 713, subclass 175.
 - II. Claims 11-26, 27-38, 39-41, 42-48 49-57, and 58-69, drawn to a method for obtaining a first domain name provided by a client, retrieving a second domain name from a digital certificate, comparing the first domain name and the second domain name

and accessing a data structure if the first domain name and the second domain do not match, classified in class 709, subclass 203.

2. The inventions are distinct, each from another because of the following reasons:

Inventions I and II are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a method where using the data structure to validate a domain name associated with an attempt to access a network site on the wired network by a mobile device on the wireless network (as set forth in invention II). See MPEP § 806.05(d).
